

CipherTrace is a leader in cryptocurrency financial intelligence. This intelligence powers blockchain analytics and compliance solutions that help to grow and strengthen the crypto economy through improved security, safety and transparency.

# 1

## **Anti-Money Laundering** *for Exchanges, Funds and MSBs/VASPs.*

Automates Cryptocurrency AML compliance with APIs to minimize legal and financial exposure. Risk-scores Bitcoin and Ethereum transactions and informs enhanced due diligence.

# 2

## **Travel Rule Compliance** *for Exchanges, Funds and MSBs/VASPs.*

CipherTrace helps financial organizations and cryptocurrency exchanges comply with global "Travel Rule" regulations and Financial Action Task Force (FATF) recommendations.

# 3

## **Financial Investigations** *for Researchers and Law Enforcement.*

Powerful blockchain forensic tools—including CipherTrace Transforms for Maltego—enable investigations of criminal activity, fraud, and sanctions evasion. Visually trace the movement of money through dark channels and gain digital evidence.

# 4

## **Crypto Risk Intelligence** *for Banks and Financial Institutions.*

Comprehensive intelligence and monitoring reveals hidden crypto-asset risks. Understand new threats, block bad actors, and avoid potential future liability.

# 5

## **Compliance Monitoring** *for Government Auditors and Banks.*

Monitor risky activity, audit trends, and regulate digital asset businesses (DABs). CipherTrace's leading monitoring technology helps ensure regulatory compliance, assess trends based on past performance, and spot suspicious activities. This allows governments to foster healthy crypto economies by attracting stable and safe DABs.

# 6

## **Blockchain Investigations/Education and Forensics Training**

*for Compliance Professionals and Forensic Investigators.*

CipherTrace can provide a deeply experienced financial investigations team to help with high-value, high-profile audit, fraud and theft cases. This team also offers hands-on experience using the world's most advanced blockchain forensics tools.

**CipherTrace** delivers cryptocurrency AML and counter terrorism financing (CTF), blockchain forensics and regulatory monitoring solutions that make crypto assets safe. At the heart of these solutions is globally shared cryptocurrency intelligence and a massive curated pool of high-quality blockchain attribution information covering more than 800 tokens. A team of researchers automates collection of this intelligence, and then validates its veracity to add between ten and twenty million unique pieces of trusted data to the pool every month. Applying proprietary clustering transforms this raw transaction data into intelligence that de-anonymizes virtual asset service providers (VASPs).

### **Good Intelligence on Bad Actors**

By working closely with regulators, banks and financial institutions, cryptocurrency exchanges and other players in the crypto economy, CipherTrace has access to the most comprehensive depth of intelligence and attribution data covering more than 800 tokens. As a key component of CipherTrace Crypto Risk Intelligence and regulatory monitoring solutions, these researchers also curate the world's most comprehensive database of cryptocurrency exchanges and their respective operational status.

### **The World's First Blockchain Forensics Team**

The founders, experienced Silicon Valley technologists and entrepreneurs, began pioneering work on blockchain security in 2011, and launched CipherTrace in 2015. The company was created to develop cryptocurrency and blockchain tracing and security capabilities, and was fund-ed by the U.S. Department of Homeland Security (DHS) Science and Technology Directorate (S&T). It is backed by leading Silicon Valley and New York

venture capital investors. The CipherTrace team includes top cryptocurrency, payments and security executives as well as world-class engineers and data scientists. These experts have deep expertise in cryptocurrency, payments, cybersecurity, Big Data, Fintech and fighting eCrime, and many members were early participants in the bitcoin community. The investigative arm of the team also has extensive expertise in global crime and fraud. CipherTrace works closely with leading government regulators and law enforcement agencies.

CipherTrace is a member the Chamber of Digital Commerce, FS-ISAC, the Blockchain Alliance, SINET (Security Innovation Network), and the Enterprise Ethereum Alliance. CipherTrace executives are regular speakers at cryptocurrency, security and law enforcement conferences around the world. CipherTrace's CEO, Dave Jevans, is also the Chairman of the Anti-Phishing Working Group, an organization that has been dedicated to fighting eCrime for 16 years. He is the first-ever court-appointed bitcoin expert witness, and a leading expert in global payments as well as bank and enterprise security and eCrime.

CipherTrace is based in Los Gatos, California, USA, and has customers around the world.

**Our goal at CipherTrace is to make the crypto economy safer. We help organizations discover money laundering, fraud, theft and suspicious activities.**
